

SHOWER TRAY

\* Shower tray thickness: 3cm

Grille positioning

Long measure	A
100 cm	20 cm
101 a 120 cm	25 cm
121 a 140 cm	30 cm
141 a 200 cm	60 cm

Same distance for all widths of shower trays.

If you need a special measure, attach your drawing.

MAINTENANCE AND CLEANING TIPS

Routine cleaning requires simply rinsing the tray with water and any commercial bathroom cleaner, then wipe down with a soft cotton cloth. Anti-lime cleaning products can be used to maintain screens or partitions clean. First apply to the tray and then rinse with water. It is important to have good ventilation in the bathroom.

Never use scouring pads (such as Scotch Brite or pads with natural fibres), as they may scratch the surfaces.

The regular use of cleaning products or disinfectants containing solvents or acids should be avoided.

Stubborn whitish stains can be removed using concentrated vinegar or a descaling agent diluted with water, at a ratio of 1 litre of descaling agent to 3 litres of water. First remove the mesh, then apply the product and let it react for 15 minutes, and finally rinse with plenty of water.

Stains of any other colour can be removed using a cloth soaked with ammonia. Wipe the stain with the cloth, allow the ammonia to react, then clean it away. If the stain persists, soak a cloth in universal solvent and repeatedly apply to the stain. Following this treatment, you must wait 48 hours before using the tray.

CHARACTERISTICS:

-  Anti-slip surface.
-  Antibacterial.
-  Easy cleaning.
-  Cut to measure.
