

LIGHT ASSEMBLY INSTRUCTIONS:

- 1 - Acting on the general switch of the installation, cut off the supply voltage before assembly and any other maintenance work on the lighting device.
- 2 - Place the light fixture on the mounting surface and secure it with the corresponding screws.
- 3 - Lock the external cable from the device to the chassis with the supplied cable tie.
- 4 - Connect the output cables of the lighting device to the main power cables (230V~) through a Korner s.r.l. model 603, IP44 or similar but with identical characteristics, paying attention that the conductors coincide (line in brown and neutral in blue). If a splice terminal block is equipped with a degree of protection IP20 the lamp will also have an IP20 protection rating.
- 5 - Reconnect the power supply through the general switch of the installation.
